It is very easy and scoring for the students. All they have to do is read the basics thoroughly, follow a strategy to finish the syllabus, practice as many model questions as possible, answer the previous year questions and get their doubts clarified. A well-prepared student can easily clear this section with proper practice and time management skills. This does not mean that the students can leave or ignore studying the other two subjects. To get admitted into the best college with the stream you wish for, students have to read and score well in all three subjects i.e, Physics, Biology and Chemistry. As per the experts' analysis, out of all the three sections in the question paper, Biology was very easy to answer. In the entire Biology session, botany was a bit difficult in the previous year's question paper. However, students who practice previous year questions and prepare well can clear the Exam easily. Syllabus of NEET BiologyFollowing is the syllabus for the NEET Biology portion:Diversity in the living worldStructural organizationCell structurePlant and human physiologyReproduction, Genetics and EvolutionBiology and human welfareBiotechnology and applicationsEcology and environment NEET syllabus is very huge. Students have to read everything for conceptual clarity. But referring to the important questions while revision will save their time and effort. This does not mean that any other questions are to be ignored. These questions are only for revision purposes.
